The Revolabs Fusion™ 4 and 8 Microphone Systems are best suited for the Audio/Visual system that is not installed in the room as a permanent feature. These systems are used in small and medium-sized conference rooms where price and ease-of-installation are major concerns.

Easy to install!

Great audio, wireless mobility, and simple to install

Simply plug the cable into the AV system or phone system and it works. No software configuration is necessary. Even the Fusion box is designed to be easy to use—vertically or horizontally. No equipment rack needed! Just set the Fusion system on the console!

Cost Effective

The Revolabs Fusion™ Systems come in a 4 and 8 Microphone Systems to match the needs of any AV conference room.

Just plug the Fusion in and enjoy great wireless audio!

Video Conferencing

Revolabs Fusion™ Wireless Microphone Solution includes all of the necessary cables to plug into any of the major video-conferencing solutions, including Lifesize, Polycom, Sony and Tandberg. It includes a remote control to control the sound volume in your conference room or in the conference room at the far end. Decide on where you want to put the Fusion system, whether you want to place it vertically or horizontally, plug in the cables and you are ready to have great wireless audio in any conference room!

Looks good on a console!

Audio Conferencing

Plug the Fusion Wireless Microphone Solution into a telephone line and you are on your way to great wireless audio. Use the remote control dialer to dial the conference phone number and set up the optional powered speakers to hear the call. If you choose to put the Fusion inside a non-metal cabinet, you must order the Remote IR Sensor.

easy-to-use

The Revolabs Fusion™ 4 and 8 Microphone Plug and Play Systems are best suited for the Audio/Visual system that is not installed in the room as a permanent feature. These systems are used in small and medium-sized conference rooms where price and ease-of-installation are major concerns.

Plug and Play

Simply plug the cable into the AV system or phone system and it works. No software configuration is necessary.

Flexible

These Systems include a Charger Base and your choice of any combination of Solo Wireless Microphones – Wearable, TableTop Boundary or XLR Adapter for Handheld microphone.

Rechargeable

These Wireless Microphone Systems have a rechargeable battery that provides eight hours of talk time after each full charge. Revolabs Wireless Microphones recharge to 85% capacity in approximately 45 minutes.

Secure

All of Revolabs Wireless Microphones use 128-bit encryption, so no one can listen in.

Cost-Effective

The Revolabs Plug and Play Systems come in a Single Channel, 4 and 8 Microphone System to match the needs of any AV conference room.
