

# Doro Prosound hs1910 DECT

A lighter, smarter wireless headset

# A headset you hardly notice!

Surveys show that headsets can reduce muscle tension in the workplace by up to 41% and boost efficiency by up to 43%.

**Weighing just 27.5 grams, Doro Prosound hs1910 DECT is the ultimate headset. As light as a feather, and comfortable when worn for long periods. It's as close as you can get to complete freedom of movement.**

Furthermore it's great value for money. It's hard to find a simpler, more profitable investment which will improve the environment and efficiency of your workplace.

## Doro Prosound hs1910 DECT

### A lighter, smarter wireless headset

- Weighs just 27.5 grams
- 150 metre range
- Line interface  
= acts like separate answering telephone
- Exceptional sound
- Best value for money headset on the market

## Choose how to wear it

Doro Prosound hs1910 DECT is very flexible.

Choose one of the following for maximum comfort

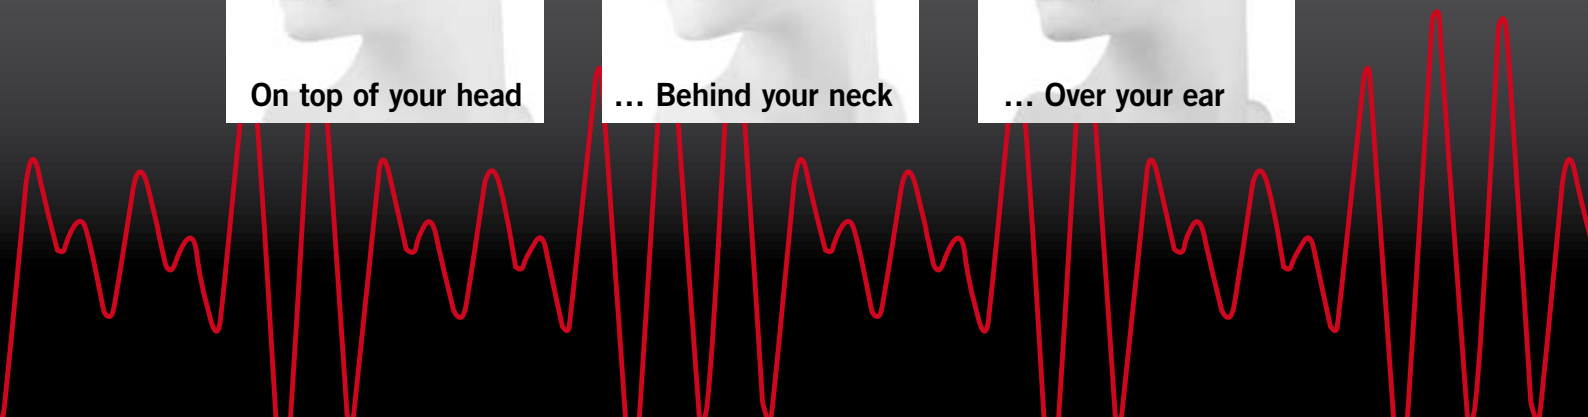

On top of your head

... Behind your neck

... Over your ear

# Exceptional sound quality

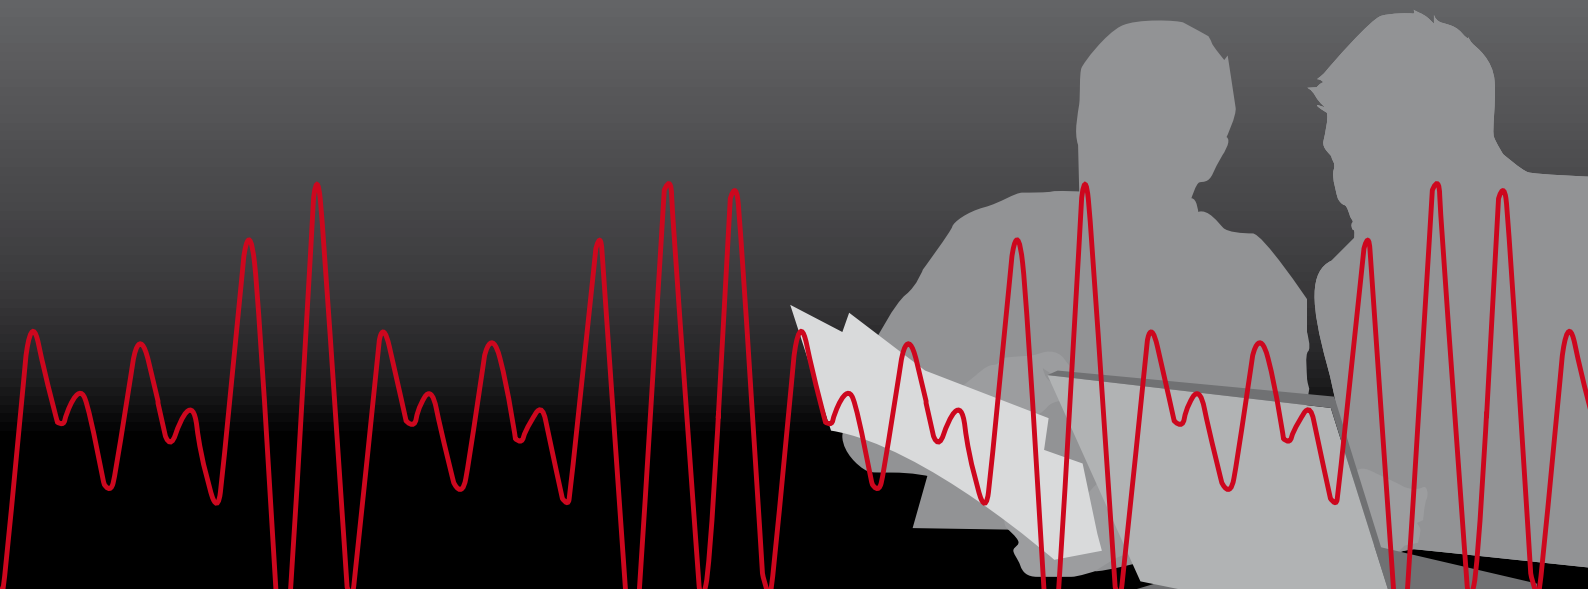

Not only is the sound quality of a conversation exceptionally high, thanks to Doro's sound filter all disruptive background noise is cut out. Our special Acoustic Burst Protection feature muffles sudden high noises immediately. Crystal sharp sound at all times – guaranteed!

## Long range sets you free

Doro Prosound hs1910 DECT gives maximum freedom both in your office at home or in a large business. Up to 150-metres range and line interface means you can answer a call by connecting directly to the phone line, with no need for a telephone. Line interface helps you connect the headset as a normal telephone in an analog socket and use the headset to answer calls. Only Doro can offer this special feature.

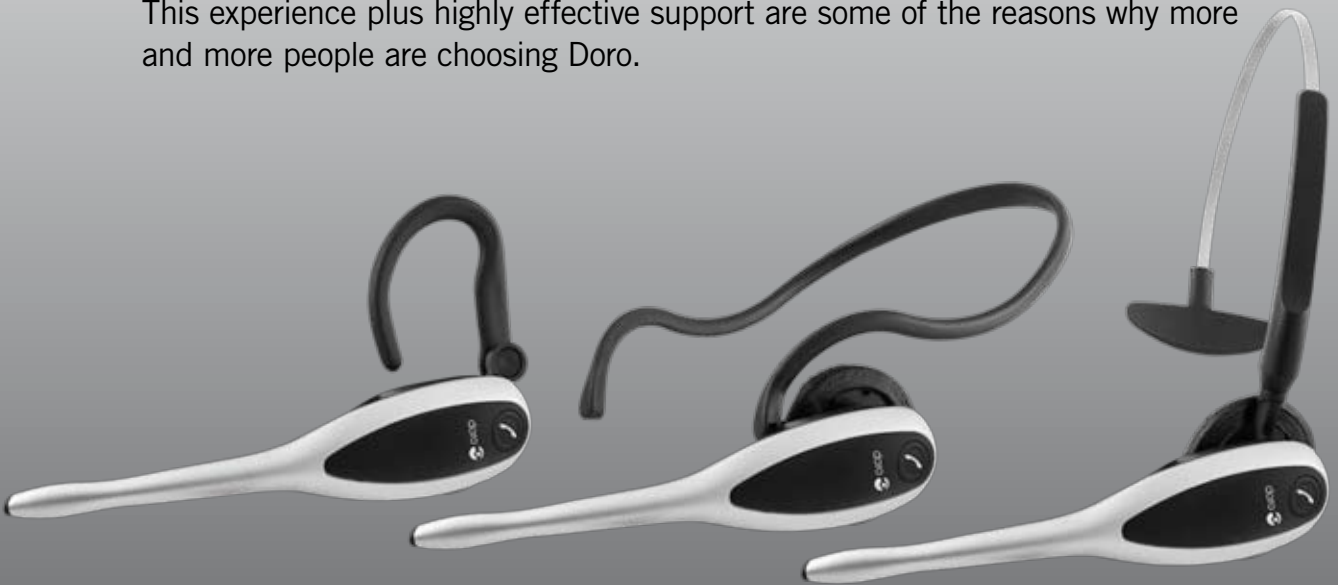

## One metre or 150 metres range?

This wireless dect headset has superior range compared with headsets that use Bluetooth® technology. Thanks to our DECT technology the range of the headset is up to 150 metres, compared with just 10 metres for a Bluetooth® headset. So, to give yourself greater wireless freedom, choose the Doro Prosound hs1910 DECT.

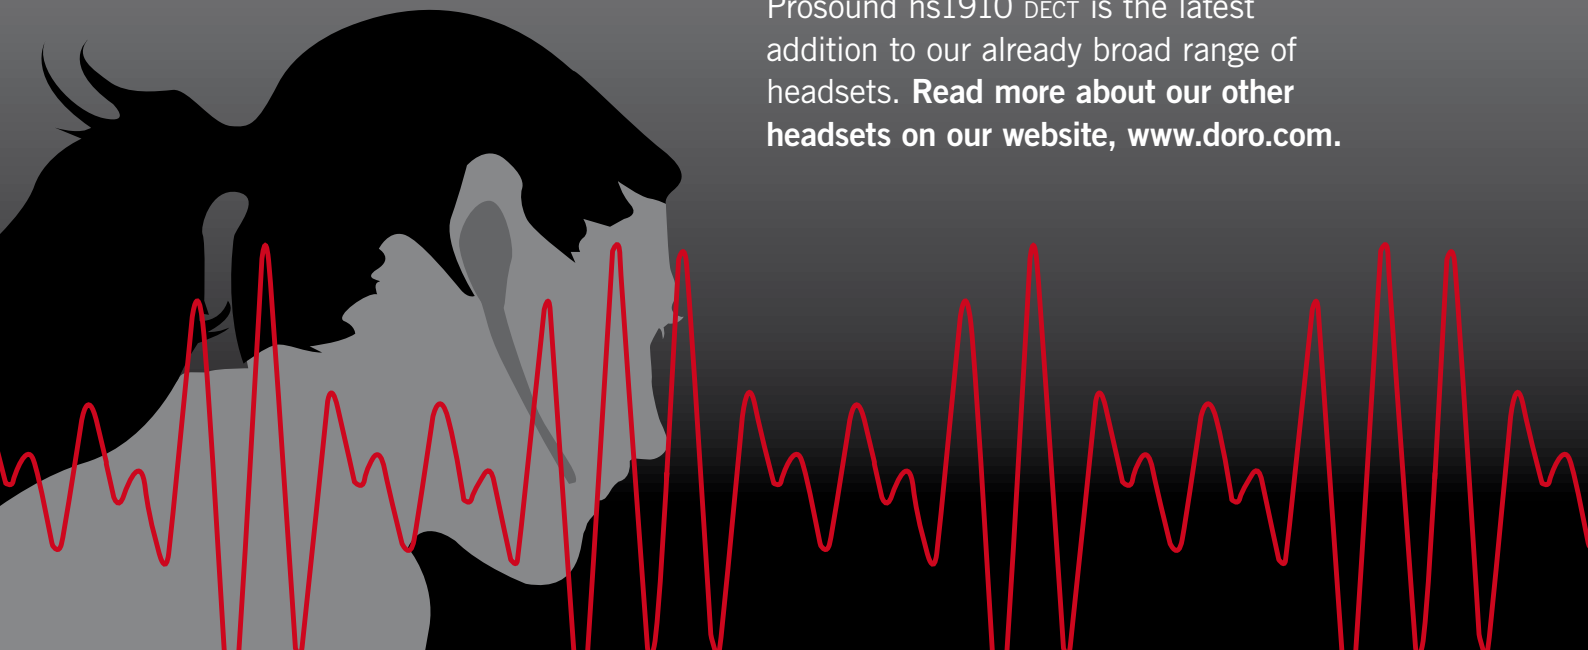

# Exceptional performance, by design

**Thirty years of experience builds quality.** We have always aimed to develop easy-to-use products of top quality at a reasonable price. We have developed telecom products for over 30 years, and worked with DECT technology for over 15 years. This experience plus highly effective support are some of the reasons why more and more people are choosing Doro.

Prosound hs1910 DECT is the latest addition to our already broad range of headsets. **Read more about our other headsets on our website, [www.doro.com](http://www.doro.com).**

# What is a handset lifter?

A handset lifter helps you answer calls when you are not near your telephone and can't press the headset button on your telephone. The handset lifter mechanically lifts the handset when you press the answer button on your headset.

A handset lifter is not needed to answer a call when you use the headset as a separate answering telephone and it is connected to a standard analog telephone line.
