Conference phones for every situation

Konftel 50 – practical conference unit for the office

The unit's perfect sound quality makes this the smarter way to hold meetings. The Konftel 50 is a flexible unit – perfect for efficient audio conferences from your desk or in smaller meeting rooms. Connects to system phones, DECT and mobile phones. For connection to computers too.

KONFTEL FEATURES

- **OmniSound® – crystal clear sound**
- **Natural sound – in both directions (full Duplex)**
- **2 year guarantee**

KONFTEL 50 FEATURES

- **Portable unit – simple to connect and use**
- **Requires no dedicated telephone line or subscription**
- **Connects to most system phones, DECT and mobile phones**
- **Can also be connected to your telephone or computer using IP telephony**
- **Keypad with volume, mute and trimming buttons**
- **Compatible with telephone features, e.g. three-way calling**
- **Can be used together with a headset**

Now you can hold a meeting anytime – regardless of distance and pressing schedules. Konftel makes telephone conferencing the ideal alternative, providing an opportunity to bring people together and hold spontaneous meetings to reach instant decisions. Konftel conference units are all equipped with the unique OmniSound®-feature – optimal sound for totally natural, crystal clear communication.

Greater possibilities!

The Konftel 50 is easy to connect and use. This flexible unit is perfect for offices and meeting rooms. The Konftel 50 has a range of up to 30 m².

Audio conferencing via your system telephone
The Konftel 50 connects to the handset outlet on your system phone. Can be connected to most PBXs. The switch box allows you to change between speaking hands-free and using the handset at the push of a button. Or connect a headset if you prefer.

Audio conferencing via your GSM or DECT phone
By simply connecting an optional cable to your Konftel 50, you can conduct an audio conference via your GSM or DECT phone. Make the call as normal and use the phone's functions.

Audio conferencing via your computer
Computers (PC/Mac) equipped with software for IP telephony (Skype.com, Alcatel WebSoftphone, Nortel IP softphone 2050 etc.) are easily transformed into a conference IP Softphone by connecting a Konftel 50 to the sound input on your computer (cables provided). Konftel can supply an optional USB adapter for direct connection to the USB port on your computer.

OmniSound® – crystal clear sound
Walk and talk freely around your room with consistently high quality sound. There is no irritating sound clipping, damping or echoes. OmniSound® produces natural sound in both directions (full Duplex) as well as 360° sound pick-up and reproduction. An ultra-sensitive microphone provides omni-directional sound pick-up and three built-in surround speakers provide crystal clear sound through the room.
