ISDN 2

Basic Rate Recording Systems

Easy connection to ISDN 2 points

MAIN FEATURES

- Ideal for extensive high quality call monitoring.
- Cost effective-does not require digital to analogue converters
- Easy to use, and simple to connect, just plug in to ISDN socket using cables and connectors provided
- Easy retrieval of calls through soft key
- Search by time, date or phone number
- Identify calls by DDI, incoming CLI (if enabled) and dialed number
- Call search & playback during recording.
- 2, 4, and 8* channel versions available for 6900 hrs to 10350 hrs recording
- White / Black list option - prevent the recording of private extensions.
- Individual handsets can activate the call recorder
- Programmable warning to notify callers that their call is being recorded
- Calls can be archived to local PC or on a LAN (additional software required)
