Safety precautions

Caution:
Read the safety precautions and the user guide before use.
Explain their contents to your children, and the potential hazards associated with using the telephone.

Only use the mains adapter supplied, as indicated on the underside of the base station.

Fit only the recommended rechargeable batteries (page 27) of the same type! I.e. do not use any other battery type or non-rechargeable batteries as this could result in significant health risks and personal injury.

Insert rechargeable batteries with the correct polarity, and use them according to this user guide (polarity symbols can be seen in the handset’s battery compartment, page 4).

The operation of medical appliances may be affected. Be aware of the technical conditions in your particular environment, e.g. doctor’s surgery.

The handset may cause an unpleasant humming noise in hearing aids.

Do not install the base station in bathrooms or shower rooms. The handset and base station are not splash proof (page 26).

Do not use the phone in environments with a potential explosion hazard, e.g. auto paint shops.

If you give your Gigaset to someone else, make sure you also give them the user guide.

All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.

This crossed-out wheeled bin symbol on the product means the product is covered by the European Directive 2002/96/EC.

The correct disposal and separate collection of your old appliance will help prevent potential negative consequences for the environment and human health. It is a precondition for reuse and recycling of used electrical and electronic equipment.

For more detailed information about disposal of your old appliance, please contact your city office, waste disposal service or the shop where you purchased the product.

Please note:
Not all of the functions described in this user guide are available in all countries.
Gigaset C460 – more than just a telephone

Your phone not only enables you to send and receive text messages over the fixed network and store up to 100 telephone numbers (page 12) – it can do a whole lot more:

- You can programme the keys of your phone with important phone numbers. The number is then dialled by simply pressing a key (page 12).
- Use the handsfree function (page 9) to keep your hands free when making a call.
- Use your handset as an alarm clock (page 23).

Have fun using your new telephone!

First Steps

Pack contents

The pack contains:
- one Gigaset C460 base station
- one Gigaset C46 handset
- one mains adapter
- one phone cord
- two batteries
- one battery cover
- one belt clip
- one user guide

Installing the base station

The base is designed to be operated in enclosed, dry areas at temperatures ranging from +5 °C to +45 °C.

- Set up the base station at a central point in the apartment or house.

Please note:
- Never expose the telephone to heat sources, direct sunlight, other electrical appliances.
- Protect your Gigaset from moisture, dust, corrosive liquids and vapours.

Connecting the base station

- First connect the mains adapter and then the phone jack as shown below.

1 Mains adapter 230 V
2 Underside of the base
3 Phone jack with phone cord

Please remember:
- Keep the mains adapter plugged in at all times for operation as the phone does not work without mains connection.
- If you buy a replacement phone cord from a store ensure that the phone jack is connected correctly.

Correct phone jack assignment

6 unused

Setting up the handset for use

Inserting the batteries

Caution:
Use only the rechargeable batteries recommended by Siemens on page 27. I.e. never use a conventional (non-rechargeable) battery or other battery type, otherwise serious damage to health and property cannot be ruled out, e.g. the outer casing of the batteries could be destroyed or the batteries could explode. The phone could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

- Fit the batteries with the correct polarity (see diagram).
First Steps

The polarity is indicated in/on the battery compartment.

Closing the battery cover
- First align the notches on the side of the battery cover with the lugs on the inside of the casing.
- Then press the cover so that it clicks into place.

Attaching the belt clip
There are notches for attaching the belt clip on the side of the handset at the same height as the display.
- Press the belt clip onto the back of the handset so that the protrusions on the belt clip engage with the notches.

Opening the battery cover
- If fitted, remove belt clip.
- Insert a fingernail into the headset socket cavity and pull the battery cover upwards.

Placing the handset in the base station and registering
Important: the handset must not already be registered to a base station.
Registering the handset to the Gigaset C460 base station occurs automatically.
- Place the handset in the charging cradle of the base unit with its display facing forward.
You will hear a confirmation tone.
Automatic registration takes around one minute. While registration is in progress the screen displays Registering and Base flashes. The handset is assigned the lowest unassigned internal number (1–4). If several handsets are registered to the base, the internal number is shown in the display after registration, e.g. INT 2. This means that the handset has been assigned the internal number 2. If the handset has been registered successfully you will see the display key INT at the bottom left of the display.
First Steps

Please note:
- Automatic registration is not possible when the base station on which you wish to register the handset is being used to make a call.
- A key press cancels automatic registration.
- If four handsets are already registered to the base station there are two options:
  - The handset with the internal number 4 is in idle status: the handset you wish to register is assigned the number 4. The handset that was previously number 4 is de-registered.
  - The handset with the internal number 4 is being used: the handset you wish to register cannot be registered.
- If automatic registration does not work the handset will have to be registered manually (page 20).

To charge the batteries, leave the handset in the charging cradle on the base station.

Initial charging and discharging of batteries

Battery charging is indicated in the top right of the display by a flashing battery icon or or . During handset operation, the battery icon indicates the charge status of the batteries (page 1).

The correct charge status can only be displayed when the batteries are first fully charged and discharged through use.

- To do this, leave the handset in the base without interruption until the battery icon stops flashing in the display (approx. 13h).
- Once the batteries are fully charged, remove the handset from the base and do not put it back again until the batteries are fully discharged.

Please note:
After the first battery charge and discharge you may replace your handset in its base after every call.

Please remember:
- Always repeat the charging and discharging procedure if you remove the batteries from the handset and re-insert them.
- The batteries may warm up as they are charging. This is not dangerous.
- After a time the charge capacity of the batteries will decrease for technical reasons.

Please note:
You will find explanations for the symbols and typographical conventions used in this user guide in the appendix, page 26.

Setting the date and time

Menu ➔ Settings ➔ Date/Time

Enter the day, month and year with 6 digits and press OK. Use ↑ to move between the fields.

Enter hours and minutes with 4 digits (e.g. 07 15 for 07.15 hrs) and press OK. Use ↑ to move between the fields.

Once the phone is registered and the time set, the idle display looks as shown on page 1.

Your phone is now ready for use.

Belt clip and headset

By using a belt clip and headset (optional) you can easily make your mobile phone a constant companion both inside the building and in its immediate vicinity.

Attaching the belt clip

There are notches for attaching the belt clip on the side of the handset at approximately the same height as the display.

- Press the belt clip onto the back of the handset so that the protrusions on the belt clip engage with the notches.

Connection socket for headset

You can connect the following types of headset (with jack connector): HAMA Plantronics M40, MX100 and MX150.
Menu tree

There are two ways to select a function:

**Using number combinations ("shortcut")**
- To open the main menu, press \section{Menu} with the handset in idle status.
- Enter the number combination that is in front of the function in the menu tree.
- Example: \section{Menu} 4 2 2 for "Set handset language".

**Scrolling through the menus (see also page 26)**
- To open the main menu, press \section{Menu} with the handset in idle status.
- Scroll to the required function with the control key and press \section{OK}.

#### 5  Voice Mail

| 5-1 Set Key 1 | 5-1-1 Network Mailbox |
Making calls

Making an external call

External calls are calls using the public telephone network.

Enter the number and press the talk key.

Or:

Press and hold the talk key and then enter the number.

You can cancel the dialling operation with the end call key.

Please note:
- Dialling with the directory (page 12) or last number redial list (page 13) saves repeated keying of phone numbers.
- You can assign a number from the directory to a key for speed dialling (page 12).
- You can edit or add to any phone number selected by means of quick dialling or from the directory and use it for the current call.

Ending a call

Press the end call key.

Answering a call

The handset indicates an incoming call in three ways: by ringing, by a display on the screen, and by the flashing handsfree key.

You can accept the call by:
- Pressing the talk key.
- Pressing the handsfree key.

If the handset is in the base and the Auto Answer function is activated (page 22), the handset will take a call automatically when you lift it out of the base.

If the ringtone is intrusive, press Silent.

You can take the call so long as it is displayed on the screen.

Calling Line Identification.

When you receive a call, the caller's number is displayed on the screen if the following conditions are met:
- Your network provider supports CLIP, CLI:
  - CLI (Calling Line Identity): the caller's number is transmitted
Operating the handset

Switching the handset on/off

Press the end call key long.
You will hear the confirmation tone.

Activating/deactivating the keypad lock

Press and hold the hash key.
You will hear the confirmation tone. The icon Ø appears in the display when the keypad lock is activated.
The keypad lock deactivates automatically when you receive a call and activates again after the call.

Please note:
The handset displays an advisory message if you press a key by accident while the keypad lock is on. To deactivate the keypad lock, press the hash key # and hold.

Display keys

The current display functions are shown in the bottom display line in reversed highlights. The function of the display keys changes depending on the particular operating situation.

Example:

1 Current display key functions
2 Display keys

The most important display symbols are:

- Back: Go back one menu level or cancel operation.
- INT: Make an internal call (page 21).
- Menu: Open the main menu or a context-dependent menu.
- OK: Confirm highlighted selection.
- <C: Delete key: backspace delete one character at a time.

Returning to idle status

You wish to return to idle status from anywhere in the menu:

Press the end call key long and hold.

Or:

Do not press any key: after 2 minutes the display will automatically revert to idle status.

Changes which you have not confirmed/stored by pressing OK will be rejected.

For an example of the display in idle status, page 1.

Control key on the handset

In this user guide, the side of the control key that you must press in the given operating situation is shown in black (top, bottom). Example: for "press the top of the control key".
The control key has a number of different functions:

When the handset is in idle status

- Open the directory.
- Adjust the ringer melody volume of the handset (page 22).

In lists and menus

- Scroll up/down line by line.

In an input field

- Move the cursor left or right.

During an external call

- Open the directory.
- Adjust loudspeaker volume for earpiece and handsfree mode.
Menu guidance

Your telephone's functions are accessed using a menu that has a number of levels.

Main menu (first menu level)

- To open the main menu, press Menu with the handset in idle status.

Accessing a function

- Scroll to the function with the control key △ and press OK.

Or:

- Enter the number that is in front of the function in the menu tree (page 7).

The corresponding submenu (the next menu level) is opened.

Submenus

The functions in the submenus are displayed as lists.

To access a function:

- Scroll to the function with the control key △ and press OK.

Or:

- Enter the number combination that is in front of the function in the menu tree (page 7).

A short press on the end call key ○ returns you to the previous menu level / cancels the operation.

Correcting incorrect entries

- Navigate to the wrong input with the control key if ‿ is displayed.
- Press [Esc] to delete the character to the left of the cursor.
- Insert new character to the left of the cursor.
- When entering the time and date etc., edit the flashing character.

You will find explanations for the symbols and typographical conventions used in this user guide in the appendix, page 26.
Using the directory and lists

The options are:
- Directory
- Last number redial list
- SMS list
- Calls list

You can save 100 entries in the directory.
You can create a personalised directory for your own individual handset. However you can send the list or individual entries to other handsets (page 12).

Directory

You can store numbers and the associated names in the directory.
- With the handset in idle status, open the directory by pressing the key.

Length of an entry
Number: max. 32 digits
Name: max. 16 characters

Please note:
You can assign a number from the directory to a key for speed dialling (page 12).

Storing the first number in the directory

- Directory empty New Entry?
  - Enter number and press OK.
- Enter the name and press OK.

Storing a number in the directory

- Menu New Entry
  - Enter number and press OK.
- Enter the name and press OK.

Selecting a directory entry

Open the directory.
You have the following options:
- Use to scroll to the entry until the required name is selected.
- Enter the first character of the name, or scroll to the entry with .

Dialling with the directory

- (select entry; page 12)
- Press the talk key. The number is dialled.

Managing directory entries

You have selected an entry (page 12).

Editing entries

- Edit the number if required, and press OK.
- Edit the name if required, and press OK.

Using other functions

The following functions can be selected with :
- Use Number
  - Edit or add to a stored number. Then dial or use other functions with .
- Delete Entry
  - Delete selected entry.
- Send Entry
  - Send a single entry to another handset (page 12).
- Delete List
  - Delete all directory entries.
- Send List
  - Send the complete list to another handset (page 12).
- Shortcut
  - Assign to the current entry for speed dialling to a selected key.

Using quick dial keys

Press and hold the required quick dial key.

Sending the directory to another handset

Requirements:
- The sending and receiving handsets must both be registered to the same base station.
- The other handset and base station can send and receive directory entries.

- (select entry; page 12) 
  - Enter the internal number of the receiving handset and press OK.

A successful transfer is confirmed by a message and confirmation tone on the receiving handset.
If you have sent a single entry, you can transfer another entry with OK.
Please remember:

- Entries with identical numbers are not overwritten in the receiving handset.
- The transfer is cancelled if the phone rings or if the memory of the receiving handset is full.

Adding a displayed number to the directory

You can copy to the directory any numbers that appear in a list, e.g. the calls list or the last number redial list.

A number is displayed.

Menu → Copy to Directory

- Complete the entry (page 12).

Copying a number from the directory

You can open the directory in many operating situations e.g. to transfer a number. Your handset need not be in idle status.

- Open the directory.
- Select entry (page 12).

Last number redial list

The last number redial list contains the ten numbers last dialled with the handset (max. 32 numbers). If one of the numbers is in the directory, then the corresponding name will be displayed.

Dialling from the last number redial list

- Press the key briefly.
- Select an entry.
- Press the talk key again. The number is dialled.

Managing entries in the last number redial list

- Press the key briefly.
- Select an entry.
- Press the display key.

The following functions can be selected with:

- Use Number (as in the directory, page 12)
- Copy to Directory

Copying an entry to the directory (page 13).

Opening the directory and lists

Delete Entry (as in the directory, page 12)
Delete List (as in the directory, page 12)

Opening lists with the message key

You can use the message key to open the following lists:

- SMS list
- Network mailbox

If your network provider supports this function and the network mailbox is configured for fast access (page 20).

- Calls list

An advisory tone sounds as soon as a new entry appears on a list. The key flashes. A message appears in the display.

When you press the flashing key, you will see all the lists that contain new messages. If only one list contains new messages, this will be opened automatically.

Please note:
If calls are stored in the network mailbox you will receive a message if the appropriate settings have been made (see the network mailbox instructions of your network provider).

Closing call list

Requirement: CLIP (page 9)

The numbers of the last 10 incoming calls are stored. Multiple calls from the same number are all stored.

The calls list is displayed as follows:

- Calls List: 01+02

Number of new entries + number of old, read entries

Opening call list

- Calls List: 01+02

Select entry.

The last incoming call is displayed in the call list.
Making cost-effective calls

List entry

Example of a list entry:

<table>
<thead>
<tr>
<th>Status of entry</th>
<th>Example</th>
<th>Date and time</th>
</tr>
</thead>
<tbody>
<tr>
<td>New Call</td>
<td>01/02</td>
<td>1234567890</td>
</tr>
<tr>
<td></td>
<td></td>
<td>11.11.05 19:27</td>
</tr>
</tbody>
</table>

- Status of entry
- New Call: new missed call.
- Old Call: entry already read.
- Call recv.: call taken.
- Entry number
  - 01/02 means e.g.: first of a total of two entries.
- Number or name of caller
  - You can add the number of the caller to the directory (page 13).
- Call date and time (if set, page 6).

You can delete the current entry with

Menu Delete Entry.

Deleting the calls list

Caution! All old and new entries will be deleted.

- Menu Calls List: Menu Delete List
- Press and hold (idle status).

Making cost-effective calls

Make your calls via a network provider who offers very low call charges (call-by-call), have the call duration displayed on your handset after the call.

Automatic network provider code (preselection)

You can specify a call-by-call number (preselection number) which is automatically placed in front of certain numbers according to two lists when you dial them.

- The list "with preselection" contains the "rule" for dialling code numbers or the first digits of dialling code numbers with which you wish the preselection number to be used.
- The list "without preselection" contains the "exception to the rule".

Example:
You have entered 08 for "with preselection". Now all numbers that start with 08 will be dialled with preselection.
However, if you want, for example, that 081 is still dialled without preselection, enter 081 for "without preselection".

Storing preselection numbers

- Menu Settings Base Preselection
- Preselection Number
- Enter or edit preselection number (call-by-call number).
- Press the display key. The entry is stored.
- Press and hold (idle status).

Saving or editing entries in the preselection lists

Each of the two lists can contain 11 entries with 4 digits.

Numbers may be prefixed according to the country in the "with preselection" list. This means, for example, that all national calls or calls to the mobile network are automatically linked to the preselection number you have stored previously.

- Menu Settings Base Preselection
- With Preselection / Without Preselection
- Select entry and press OK.
- Enter or edit first digits of number.
- Press the display key. The entry is stored.
- Press and hold (idle status).

Temporarily cancelling preselection

- (press and hold) Menu Automatic
- Preselect off

Permanently deactivating preselection

- Delete the preselection number with <C> and press OK.
Displaying the call duration

The duration of a call is displayed
◆ during the conversation,
◆ until about three seconds after the call has ended if you do not replace the handset in the charging cradle.

Please note:
The actual duration of the call can vary from that shown by a few seconds.
SMS (text messages)

Your unit is supplied ready for you to send text messages immediately.

Requirements:

◆ Calling Line Identification (CLIP, page 9) is enabled for your phone connection.

◆ Your network provider supports SMS in the fixed network (information on this can be obtained from your network provider).

◆ You are registered with your service provider to send and receive SMS.

Text messages are exchanged between SMS centres that are operated by service providers. You must enter the SMS centre in the unit through which you wish to send and receive. You can receive SMS from every SMS centre that is entered if you have registered with your service provider.

Your text message is sent through the SMS centre that is active (page 18). Only one SMS centre can be active at any one time.

If no SMS centre is entered, the SMS menu only consists of the entry Settings. Enter an SMS centre (page 18).

Please remember:

◆ If your phone is connected to a PABX, please read page 18.

◆ You must be registered with your service provider to receive SMS text messages.

◆ Each incoming SMS is signalled by a single ring (ringtone as for external calls). If you accept such an SMS call on the first ring, the SMS will be lost. To prevent this, suppress the first ringtone for all external calls (page 23).

Writing/sending an SMS

An SMS may contain up to 160 characters.

Writing/sending an SMS

Menu ➔ SMS ➔ Write Message

Write an SMS. For how to enter the text, see page 29.

Menu Send Text

Select and press OK.

Draft message list

In the draft message list, you can save, edit later and send an SMS.

Saving an SMS in the draft message list

You are writing an SMS (page 16).

Menu ➔ Save Text

Opening the draft message list

Menu ➔ SMS ➔ Outgoing

The first entry in the list is displayed, e.g.:

Saved 01/02
11.11.05 19:27

01/02: Current number/total number of SMS text messages

Reading or deleting individual SMS messages

◆ Open the draft message list.

Menu Read SMS

Select and press OK to read the message. Scroll in the SMS using .

Or:

Menu Delete Entry

Select and press OK to delete the message.

Writing/editing an SMS

You are reading an SMS in the draft message list.

Menu

Press the display key.

You have the following options:
Write Message
Write and then send a new SMS (page 16) or save.

Use text
Edit the text of the saved SMS and then send (page 16).

Deleting draft message list
- Open the draft message list.

Menu Delete List
Select and press OK.

OK
Press the display key to confirm the delete. The list is cleared.

¥
Press and hold (idle status).

Receiving an SMS
All received text messages are saved in the incoming message list. Linked text messages are displayed as one message. If this is too long or has not transferred completely, it will be split into individual messages. Since an SMS remains in the list even after it has been read, you should regularly delete SMS messages from the list.

The display tells you if the message memory is full.
- Deleting text messages you no longer require (page 17).

Incoming list
The incoming message list contains:
- all received SMS messages, starting with the latest.
- messages that could not be sent on account of an error.

New text messages are signalled on all Gigaset C46 handsets by a message in the display, the flashing message key ¥ and an advisory tone.

Opening the incoming message list with the ¥ key
¥
Press.

The incoming message list is displayed as follows (example):

<table>
<thead>
<tr>
<th>SMS:</th>
<th>01+05</th>
</tr>
</thead>
</table>

01+05: The number of new + the number of old, read messages.

An entry in the list is displayed e.g as follows:

<table>
<thead>
<tr>
<th>01/02</th>
<th>1234567890</th>
</tr>
</thead>
</table>

01/02: Current Number of the SMS currently in the display / total number of new SMS messages

Opening the incoming message list via the SMS menu

Menu → SMS → Incoming 01+05

Reading or deleting individual SMS messages
- Open the incoming message list.
- Continue as described at “Reading or deleting individual SMS messages”, page 16.

A new message which you have read acquires the status Old.

Deleting incoming message list
All new and old SMS in the list are deleted.
- Open the incoming message list.
- Press the display key.
- Continue as described for "Deleting draft message list", page 17.

Replying to or forwarding text messages

You are reading an SMS (page 17).

Menu Press the display key.

You have the following options:

Reply
Write and send a reply SMS directly (page 16).

Use text
Edit the text in the SMS and then send it (page 16).

Send
Forward the text of an SMS to another recipient (page 16).

Adding a number to the directory

Adding the sender’s number
You are reading an SMS in the incoming message list.

Menu Press the display key.

Continue see page 13.
Setting SMS centre:

Entering/changing SMS centres

» You should find out about the services and special functions offered by your service provider before you make a new application and before you delete preconfigured phone numbers.

You have the following options:

Active Send Serv. Centre
If the SMS messages are to be sent through this SMS centre, press OK to activate the SMS centre (✓ = on). If a different SMS centre was active previously, then this will be deactivated.

SMS Centre No
Enter the number of the SMS centre and press OK.

Sending an SMS through another SMS centre

» Activate the SMS centre (2 or 3) as the active send service centre (page 18).
» Send the SMS.

SMS to a PABX

» You can only receive an SMS when the Calling Line Identification (page 9) is forwarded to the extension of the PABX (CLIP). The CLIP of the phone number for the SMS centre is evaluated in your Gigaset.

» Depending on your PABX, you may have to add the access code (external line prefix) before the number of the SMS centre.
In doubt, test your PABX e.g. by sending an SMS to your own phone number, once with and once without the access code.
» When you send SMS messages, your sender number may be sent without your extension number. In this case the recipient cannot reply to you directly.

Sending and receiving SMS on ISDN PABXs is only possible via the MSN number assigned to your base station.

Activating/deactivating the SMS function

When you switch off you cannot send or receive any SMS with your phone.

Settings which you have made for sending and receiving text messages (the numbers of SMS centres) and any entries in the incoming message and draft message lists will be retained even after the function is deactivated.

Deactivate the SMS function.
Or:
Activate the SMS function (default settings).

SMS troubleshooting

Errors when sending
If an SMS cannot be sent for a longer period of time, it is moved to the incoming message list and given the status Error XX.

<table>
<thead>
<tr>
<th>Error</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ED</td>
<td>Calling Line Identification permanently withheld (CLIR) or Calling Line Identification not activated.</td>
</tr>
<tr>
<td>FE</td>
<td>Error occurred during SMS transfer.</td>
</tr>
<tr>
<td>FD</td>
<td>Connection to SMS centre failed, see self-help.</td>
</tr>
</tbody>
</table>
**Self-help with errors**

The following table lists error situations and possible causes and provides notes on troubleshooting.

<table>
<thead>
<tr>
<th>You cannot send messages.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. You have not requested the CLIP service (Calling Line Identification Presentation, page 9).</td>
</tr>
<tr>
<td>‣ Ask your service provider to enable this service.</td>
</tr>
<tr>
<td>2. Text message transmission has been interrupted (e.g. by a call).</td>
</tr>
<tr>
<td>‣ Re-send the text message.</td>
</tr>
<tr>
<td>3. Network provider does not support this feature.</td>
</tr>
<tr>
<td>4. No number or an invalid number is entered for the SMS centre activated as the send centre.</td>
</tr>
<tr>
<td>‣ Enter phone number (page 18).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>You receive a message whose text is incomplete.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Your phone memory is full.</td>
</tr>
<tr>
<td>‣ Delete old messages (page 17).</td>
</tr>
<tr>
<td>2. The service provider has not yet sent the rest of the message.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>The message is played back.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. The “display call number” service is not activated.</td>
</tr>
<tr>
<td>‣ Ask your service provider to activate this function (chargeable).</td>
</tr>
<tr>
<td>2. Mobile phone operator and network SMS service provider have not agreed on a cooperation.</td>
</tr>
<tr>
<td>‣ Obtain information from your network SMS service provider.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>You cannot access the SMS functions on your handset.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Another handset that is registered at the same base station is currently using the SMS functions.</td>
</tr>
<tr>
<td>‣ Wait until there is no other handset using the SMS functions.</td>
</tr>
</tbody>
</table>
Using the network mailbox

The network mailbox is your network provider’s answering machine. You cannot use the network mailbox unless you have applied to your network provider.

Configuring the network mailbox for fast access

With fast access, you can direct dial the network mailbox.

The network mailbox is preconfigured for fast access. You only need to enter the network mailbox number.

Configuring the network mailbox for fast access and entering the network mailbox number

1. **Menu** ➔ Voice Mail ➔ Set Key 1
2. **Network Mailbox**
   - Select and press **OK** (✓ = on).
   - Enter the network mailbox number and press **OK**.
   - The entry is stored.
3. Press and **hold** (idle status).

This setting is now valid for all registered handsets.

Calling the network mailbox

1. Press and **hold**. This connects you directly to the network mailbox.

2. Press handsfree key **q** if required. You hear the network mailbox announcement.

Viewing a message from the network mailbox

When a message arrives for you, you get a call from the network mailbox. If you have requested Calling Line Identification, the display shows the network mailbox number. If you accept the call, the new messages are played back. If you do not accept the call, the network mailbox number will be stored in the list of missed calls and the message key flashes (page 13).

Using several handsets

Registering handsets

You can register up to four handsets on your base station.

Automatic registration Gigaset C46 to Gigaset C460, see page 5.

Manual registration Gigaset C46 to Gigaset C460

You must activate manual registration of the handset at both the handset and the base station.

After it has registered, the handset returns to idle status. If several handsets are registered to the base, the internal number is shown in the display after registration, e.g. INT 2.

The registration process is cancelled after 60 seconds. If the handset has not registered within this time, repeat the process.

On the handset

1. **Menu** ➔ Settings ➔ Handset ➔ Register Handset
2. Enter the system PIN of the base station (the default is 0000) and press **OK**.
   - Base is flashing in the display.

On the base station

1. Press and hold the registration/paging key on the base station (page 1) (min. 1 sec.).

Registering other handsets

You can register other Gigaset handsets and handsets for other devices with GAP functionality as follows.

On the handset

1. Start to register the handset as described in its user guide.

On the base station

1. Press and hold the registration/paging key on the base station (page 1) (min. 1 sec.).
Locating a handset ("Paging")

You can locate your handset using the base station.
- Press the registration/paging key on the base station (page 1) briefly.
- All handsets will ring at the same time ("paging"), even if the ringers are switched off.

Ending paging
Briefly press the registration/paging key on the base station (page 1) or press the talk key on the handset.

Making internal calls

Internal calls to other handsets registered on the same base station are free.

Calling other handsets

Press the display key. All handsets are called.

Ending a call

Press the end call key.

Transferring a call to another handset

You can transfer an external call to another handset (connect).

Press the display key. All handsets are called.
The external caller hears the hold music.

When an internal party answers:
- If necessary announce the external call.
- Press the end call key.
The call is transferred. If the internal party does not answer or their phone is in use the call will automatically return to you.

Internal consultation calls

When you are speaking to an external participant you can simultaneously call an internal participant for consultation.

Press the display key. All handsets are called.
The external caller hears the hold music.

When an internal party answers you can speak to them.

Ending an enquiry call

Press the display key.
You are reconnected with the external caller.

Accepting a waiting call

If you get an external call while conducting an internal call, you will hear the call waiting tone (short tone). The caller's number will appear in the display if phone number identification is enabled.

Press the end call key to end the internal call.
Press the talk key to take the external call.

Listening in to an external call

You are conducting an external call. An internal caller can listen in on this call and take part in the conversation. All the participants are made aware of the 'listening in' by a signal tone.

Requirement: The Listening in function must be activated.

Activating/deactivating internal listening in

Press and hold (idle status).

Internal listening in

The line is engaged with an external call. Your screen will display information to that effect.
You want to listen in to the existing external call.
Press and hold the talk key.
You are linked into the call. All participants hear a signal tone.

Ending listening in

Press the end call key.
All participants hear a signal tone.
If the first internal participant presses the end call key, the handset that has 'listened in' remains connected to the external caller.
Handset settings

Changing the display language

You can view the display texts in different languages.

Menu → Settings → Handset → Language

The current language is indicated by ✓.

Press and hold (idle status).

If you accidentally choose a language you do not understand:

Menu 4 2 2

Press keys one after the other.

Select a language and press OK.

Select the correct language and press OK.

Adjusting the loudspeaker volume

You can set the loudspeaker volume for hands-free talking to five different levels and the earpiece volume to three different levels. You can only adjust the loudspeaker volume during a call.

You are conducting an external call.

Press the control key.

Adjust the volume and press OK.

Changing ringtones

• Volume:
  Five volume levels (1–5; e.g. volume 2 = crescendo) and "crescendo" ring (6; volume increases with each ring = crescendo).

• Melody:
  List of pre-loaded ringer melodies. The first three melodies are the "classical" ring tones.

You can also set different melodies for the following functions:

• External Calls: For external calls
• Internal Calls: For internal calls
• Alarm Clock: For the alarm clock

Setting ringer volume

The ringer volume is the same for all types of ring.

Menu → Audio Settings → Ringer Volume

Or in idle status:

Press briefly.

Then:

Adjust the volume and press OK.

Press and hold (idle status).
Setting ringer melody
Set different ringer melodies for external calls, internal calls and the alarm clock.

- **Menu** → Audio Settings → Ringer Melody
  - External Calls / Internal Calls / Alarm Clock
    - Select and press **OK**.
    - Select melody (✓ = on) and press **OK**.
    - Press and hold (idle status).

Activating/deactivating the ringer
You can turn off the ringer on your handset before you take a call or while the phone is in the idle state. You can take a call as long as it is displayed on the screen.

- **Deactivating the ringer**
  - Press the star key and hold, until the ⬇ icon appears in the display.

- **Re-activating the ringer**
  - Press and hold the star key in idle status.

Activating/deactivating suppression of the first ringtone
The phone identifies an incoming SMS from the first network signal.

- **Menu** → 4 3 9 2 5
  - Select melody (✓ = on).

Setting the battery warning tone

- **Menu** → Audio Settings → Battery Low
  - On / Off / During Call
    - Select and press **OK** (✓ = on).

Using the handset as an alarm clock

Activating/deactivating the alarm clock
After you activate the alarm clock, the menu for setting the wake up time opens automatically (page 23).

- If the alarm clock is set, the wake up time appears with the ⌁ icon in the display instead of the date.

Setting the wake up time

- **Menu** → Alarm Clock → Wake up time
  - Enter the wake up time in hours and minutes, then press **OK**.
Base station settings

When the alarm clock rings…

Alarm repeat after 5 minutes

Press the display key or any key. If you press "Snooze" three times the alarm clock switches off for 24 hours.

Switching off the alarm clock for 24 hours

Press the display key.

Restoring the handset default settings

You can reset any individual settings and changes that you have made. This will not affect entries in the directory, calls list, or SMS lists or the handset's registration to the base station.

You can reset any individual settings and changes that you have made. This will not affect entries in the directory, calls list, or SMS lists or the handset's registration to the base station.

Resetting the base station using the menu

Menu ➔ Settings ➔ Base ➔ Base Reset

Press the display key to confirm.

Restoring the base station to factory settings

When the settings are restored all handsets are de-registered. Each individual setting is restored. Only the date and time are retained.

Resetting the base station using a key on the base station

- Remove the base station mains adapter (page 4) from the power socket.
- Press the registration/paging key (page 1) and hold down.
- Replug the mains unit into your power socket.
- Continue to press the registration/paging key (page 1).
- Release the registration/paging key (page 1). The base station has now been reset.

Operating the base station on the PABX

The following settings are only needed when your PABX requires them. Please refer to the user guide for your PABX.

You cannot send or receive SMS messages on PABXs that do not support Calling Line Identification.

Dialling modes and flash time

Changing the dialling mode

You can set the dialling mode.

Menu 4 3 9 1 1

Pulse dialling mode (DP).

Or:

Menu 4 3 9 1 2

Touch tone dialling (DTMF).

Setting the flash time

You can set the flash time.

Menu 4 3 9 1 2

Enter digits for the flash time and press OK.

0 = 80 ms; 1 = 100 ms; 2 = 120 ms;
3 = 180 ms; 4 = 250 ms; 5 = 300 ms;
6 = 600 ms; 7 = 800 ms

Press and hold (idle status).
Setting pauses

Changing pause after line seizure

You can set the length of the pause inserted between pressing the talk key \ and sending the phone number.

Menu 4 3 9 1 9

- Enter digit for the pause length (1 = 1 sec.; 2 = 3 sec.; 3 = 7 sec.) and press OK.

- Press and hold (idle status).

Changing the pause after the recall key

You can change the length of the pause if your PABX requires this (refer to the user guide for your PABX).

Menu 4 3 9 1 4

- Enter a digit for the length of the pause (1 = 800 ms; 2 = 1600 ms; 3 = 3200 ms) and press OK.

- Press and hold (idle status).

Switching temporarily to tone dialling (DTMF)

If your PABX still operates with dial pulsing (DP), but you need tone dialling (DTMF) for a connection (e.g. to listen to the network mailbox) you must switch to tone dialling for the call.

Requirement: You are conducting a call or have already dialled an external number.

- Press the star key. Tone dialling is now activated for this call only.
Appendix

Symbols and typographical conventions used

This section explains the meaning of certain symbols and typographical conventions that are used in this user guide.

Enter digits or letters. 

The display functions currently in the bottom display line are shown in reversed highlights. Press the relevant display key to launch the function.

Press the top or bottom of the control key, e.g. when scrolling.

Press the illustrated key on the handset.

External Calls / Internal Calls (example) 
Select one of the menu functions (External Calls or Internal Calls) from the list and press OK.

Press Menu. Select Audio Settings using and press OK. Select Ringer Melody using and press OK.

Care

- Wipe the base station and handset with a damp cloth (do not use solvent) or an anti-static cloth.

Never use a dry cloth. This can cause static.

Contact with liquid

If the handset has come into contact with liquid:

- Switch the handset off and remove the batteries immediately.
- Allow the liquid to drain from the handset.
- Pat all parts dry, then place the handset with the battery compartment open and the keypad facing down in a dry, warm place for at least 72 hours (not in a microwave, oven etc.).
- Do not switch on the handset again until it is completely dry.

When it has fully dried out, you will normally be able to use it again.

Questions and answers

Guarantee Certificate

United Kingdom

Without prejudice to any claim the user (customer) may have in relation to the dealer or retailer, the customer shall be granted a manufacturer’s Guarantee under the conditions set out below:

♦ In the case of new devices and their components exhibiting defects resulting from manufacturing and/or material faults within 24 months of purchase, Siemens shall, at its own option and free of charge, either replace the device with another device reflecting the current state of the art, or repair the said device. In respect of parts subject to wear and tear (including but not limited to, batteries, keypads, casing), this warranty shall be valid for six months from the date of purchase.

♦ This Guarantee shall be invalid if the device defect is attributable to improper treatment and/or failure to comply with information contained in the user guides.

♦ This Guarantee shall not apply to or extend to services performed by the authorised dealer or the customer themselves (e.g. installation, configuration, software downloads). User guides and any software supplied on a separate data medium shall be excluded from the Guarantee.

♦ The purchase receipt, together with the date of purchase, shall be required as evidence for invoking the Guarantee. Claims under the Guarantee must be submitted within two months of the Guarantee default becoming evident.

♦ Ownership of devices or components replaced by and returned to Siemens shall vest in Siemens.

♦ This Guarantee shall apply to new devices purchased in the European Union. For Products sold in the United Kingdom the Guarantee is issued by: Siemens Home and Office Communication Devices GmbH & Co. KG, Schlavenhorst 66, D-46395 Bocholt, Germany.

♦ Any other claims resulting out of or in connection with the device shall be excluded from this Guarantee. Nothing in this Guarantee shall attempt to limit or exclude a Customers Statutory Rights, nor the manufacturer’s liability for death or personal injury resulting from its negligence.

♦ The duration of the Guarantee shall not be extended by services rendered under the terms of the Guarantee.
Insofar as no Guarantee default exists, Siemens reserves the right to charge the customer for replacement or repair. The above provisions does not imply a change in the burden of proof to the detriment of the customer.

To invoke this Guarantee, please contact the Siemens telephone service. The relevant number is to be found in the accompanying user guide.

**Writing and editing a text message**

The following rules apply when writing a text message:

- The cursor is controlled with ( ) .
- Characters are added to the left of the cursor.
- Press the hash key briefly to switch from "Abc" mode to "123", from "123" to "abc", and from "abc" to "Abc" (upper case: 1st letter upper case, all others lower case). Press the hash key before entering the letter.
- Press and hold the hash key : Shows the selection line of the characters assigned to the hash key.
- The first letter of the name of directory entries is automatically capitalised, followed by lower case letters.

**Editing text**

When you press a key and hold it, the characters of that key appear in the bottom display line and are highlighted one after the other. When you release the key the highlighted character is inserted into the input field. For how to enter special characters, see page 29.

The display briefly shows whether upper or lower case letters or digits is selected when you switch from one mode to the next. The bottom text line displays "abc -> Abc", "Abc -> 123" or "123 -> abc".

**Order of directory entries**

The directory entries are usually sorted in alphabetical order. Spaces and digits take first priority. The sort order is as follows:

1. Space (shown here as )
2. Digits (0–9)
3. Letters (alphabetical)

**Entering special characters**

<table>
<thead>
<tr>
<th>Standard characters</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
</tr>
<tr>
<td>*) Directory and other lists</td>
</tr>
<tr>
<td>**) When writing an SMS</td>
